\* Согласно Книге Рекордов Гиннеса, самым тяжелым котом в мире был Австралийский кот Nimmu, который весил 21 килограмм. Рекорд был установлен в 1986 году. Его талия была 84 сантиметра! Предыдущий рекордсмен - Spice, рыже-белый кот из Коннектикута, весил 20 кг. Самым крошечным котом на свете был гималайский кот Tinker Toy из Иллинойса. Он весил 680 грамм, был 18 см в длину и его рост составлял 7 см! \*

\*

Кошки – очень ленивые млекопитающие. Они спят 16 часов в сутки. Семилетняя кошка бодрствовала только в течение двух лет жизни! При этом глубокий сон занимает только 2,5 часа. Кошка переходит от бодрствования ко сну быстрее, чем почти все остальные животные. Кошки более активны вечером. Кошки, когда не спят, ухаживают за собой 30% времени.

✱

Если вашей кошке 3 года, это соответствует человеческим 21 году. Если 8 лет, то по человечески - 40. Если 14, то 70 человеческих лет. Самой старой кошкой на свете была Puss из Англии, которая умерла в 1939 году через день после своего 36-ого дня рождения.
